Dear Commissioner for Patents,

I am very pleased to get your notice. After carefully reading through related CFR rules and your requirements, I have revised all the parts one by one according to your letter. Briefly, I would like to make my revised application clear in the following items:

1. To delete the diagrams which was not submitted in formal drawing in accordance with 37 CFR 1.81,
2. To take the sequence list as a separate part with a separate sequence identifier for each sequence under the assistance of PatentIn 3.1, and add related statement which is identical to the written sequence listing on paper and disc.
3. To provide the computer readable form copy of the sequence listing (A compact Disc and a compact Disc case) made with software PatentIn 3.1, and the statement that contains a sequence list in txt file on the compact disc.

If you have any questions about my application, please feel free to contact me.

Thanks for your time and efforts.

Sincerely,

James Q. Yin, M.D., Ph.D., MBA
